

Dear Editor,

We would like to submit the attached manuscript, Anonymiced shareable data: Using mice to create and analyze multiply imputed synthetic data sets for consideration for possible publication in the special issue on *Computational Aspects, Statistical Algorithms and Software in Psychometrics* in **Psych.** The manuscript outlines a procedure to generate synthetic data sets with **mice** in R. The proposed workflow yields valid univariate and multivariate estimates and allows for valid inference on synthetic data sets generated with **mice**. We believe that the procedure in our manuscript solves an important problem for applied research and the readership of **Psych.**

The paper has not been published or accepted for publication elsewhere. It is not under consideration at another journal or at Sociological Methods and Research.

Sincerely,

Thom Volker
Gerko Vink
